Meridian Markets SOP: Stock Discrepancy Escalation (Global)

Fictional standard operating procedure for demonstration.

1. When a stock discrepancy is found during a count, verify the physical count against the system on-hand figure.

2. Report the discrepancy to the duty manager within 15 minutes.

3. Log the discrepancy in the incident system with SKU, expected and actual quantities, and the counter name.

4. For chilled products, perform a temperature check before re-shelving.

5. The regional inventory control team confirms the adjustment within one business day for discrepancies above threshold.
